Application/Control Number: 10/645,826

Art Unit: 2125

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claim 7, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-2, 4 and 6-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Abriam et al. (U.S. Patent 5,933,353).

Regarding claims 1-2 and 6-9, Abriam discloses that a computer (22) including a job manager program (74, i.e., G-code) configured to receive a data file including a material list (70 and 72) for a product, to display the material list in a spreadsheet (Fig. 4) and to permit editing, and sorting data by field (column 3, lines 49-56; column 6, lines 34-36; Fig. 4; Fig. 6A- Fig. 6D); a machine configured to process stock material including an optimizer (56) capable of determining an optimal processing sequence according to a specified material list (column 6, lines 1-16); and a downloading mechanism enabling

Art Unit: 2125

transfer of selected data from the job manager to the optimizer (Fig. 2, column 12, lines 53-66; column 16, lines 36-42). In addition, Abriam discloses that editing and sorting data in the selected field prior to the downloading step (column 12, lines 29-35; Fig. 2; Fig. 10A to Fig. 10E); the step of operation a saw to cut stock material according to data received by the optimizer (column 1, lines 33-38); the machine is selected from the following group: redial arm saw, rib fence, upcut saw, metal tube cutter, boring machine, punch press, vertical router, metal Shearer, mortiser, and tenoner (Fig. 1A and Fig. 1B).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abriam (U.S. Patent 5,933,353) in view of Tadokoro et al. (U.S. Patent 6,463,352).

Regarding claims 3 and 5, Abriam discloses the claim limitations of 1 as stated above, however, Abriam fails to discloses the specifically the material list are the cut list and the cut list of wood dimensions for the product as claimed in claim 3 and 5. Tadokoro discloses that the material list including a cut list (Fig. 10C) and the cut list of dimensions for the product (Fig. 11D).

It would have been obvious to a person of ordinary skill in the art at the time of invention to modify the teaching of Abriam with the teaching of Tadokoro in order to

Application/Control Number: 10/645,826

Art Unit: 2125

determine the dimensions of each part in the job on the basis of the part dimension in the located machine instruction records.

Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 7. Any inquiry concerning communication or earlier communication from the examiner should be directed to Kidest Bahta, whose telephone number is (703) 308-6103. The examiner can normally be reached on M-F from 7:30 a.m. to 4:00 p.m. EST.

If attempts to reach the examiner by phone fail, the examiner's supervisor, Leo Picard, can be reached (703) 308-0538. Additionally, the fax phone for Art Unit 2125 is (703) 872-9306. Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist at (703) 305-9600.
